EDUCATION

National University of Computer and Emerging Sciences (NUCES-FAST) Karachi, Pakistan
Bachelor of Science in Computer Science — CGPA: 3.27/4.00 2023 – 2027

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, C
Frameworks & Libraries: React, Next.js, Node.js, Express.js, Streamlit, Bootstrap, Tailwind CSS, scikit-learn, NumPy, Pandas, Seaborn, Java Spring Boot
Databases: MongoDB, Neo4j, PostgreSQL
Tools & Technologies: RESTful APIs, SPARQL, JWT Authentication, Google Sheets API, Gemini AI, OpenRouter, Git

EXPERIENCE

Full Stack Engineer Dec 2025 – Jan 2026
NUCES-FAST Olympiad 2026 Karachi, Pakistan

- Built a responsive event registration platform using React, enabling smooth sign-up for 25+ participants.
- Designed user-friendly forms with real-time validation and feedback, significantly improving user experience.
- Integrated Google Sheets API for seamless, automated data collection and participant management.

Web Development Intern July 2024 – Aug 2024
Atlas IT Resource Center Karachi, Pakistan

- Developed responsive web pages using HTML, CSS, JavaScript, and WordPress with cross-browser compatibility.
- Collaborated with stakeholders to refine UI/UX, delivering user-friendly solutions aligned with client requirements.

PROJECTS

SkillMap | *Next.js, ESCO, Wikidata, SPARQL, Gemini AI* | [Live Demo](#)

- Built a full-stack AI platform mapping user skill goals to a knowledge graph using ESCO and Wikidata (SPARQL).
- Designed an AI pipeline with Gemini 2.0 Flash via OpenRouter to identify skill gaps and generate structured learning paths.
- Developed interactive 2D/3D force-directed graph visualizations with persistent user paths for exploration and expansion.

SkillGraph | *Node.js, Express.js, Neo4j, React* | [GitHub](#)

- Built a full-stack knowledge graph tool integrating the Wikidata API with SPARQL for structured entity search.
- Implemented RESTful APIs and CRUD operations with Node.js, Express.js, and Neo4j graph database.
- Integrated Python-based NLP pipelines for entity linking and semantic data enrichment.

Fitfat | *scikit-learn, NumPy, Streamlit, Seaborn*

- Developed an AI-based Recommendation System using hybrid Collaborative Filtering (CF) and Content-Based Filtering (CBF).
- Trained ML models with scikit-learn (DecisionTreeClassifier + SVD) and built an interactive UI with Streamlit.
- Visualized recommendation outputs and model performance metrics using Seaborn for data-driven insights.

Servia | *Node.js, Express.js, PostgreSQL, Flask* | [GitHub](#)

- Built a full-stack web application with role-based authentication, RESTful APIs, and secure CRUD operations.
- Implemented JWT-based authentication and data encryption for robust, secure backend services.
- Designed a multi-role system architecture separating client and service-provider workflows with dedicated access controls.
